Shipping Container Base

For lifting Oak Base from Container Base

Tee nuts to secure Oak Base To Container Base

For locating Oak Base on Container Base

Securing Oak Base to Shipping Container Base

Locate Oak Base between black blocks and Lines at each end of Shipping Container Base.
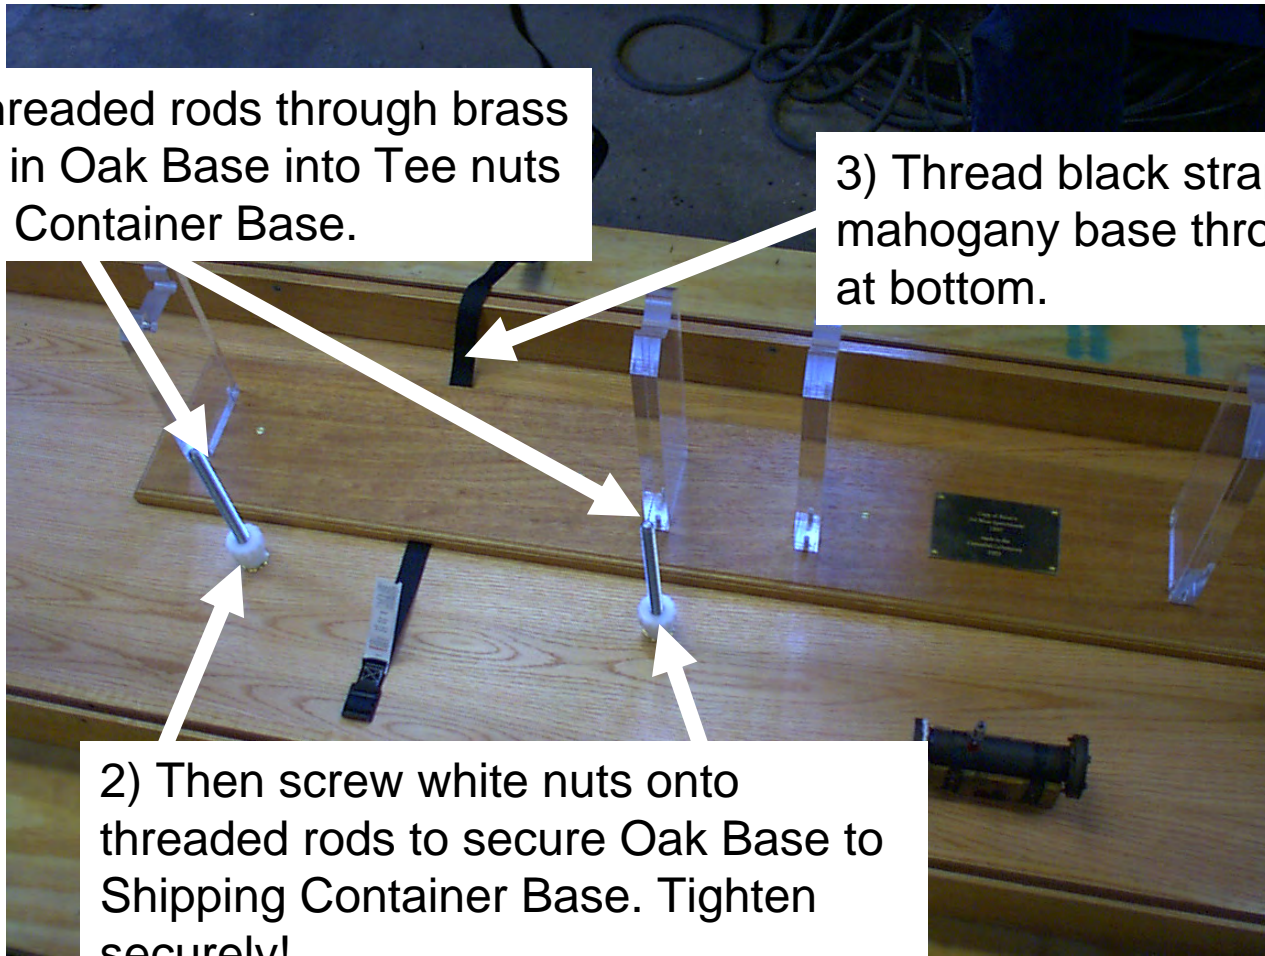

This will align brass fitted holes in Oak Base with Tee nuts in Shipping Container Base.
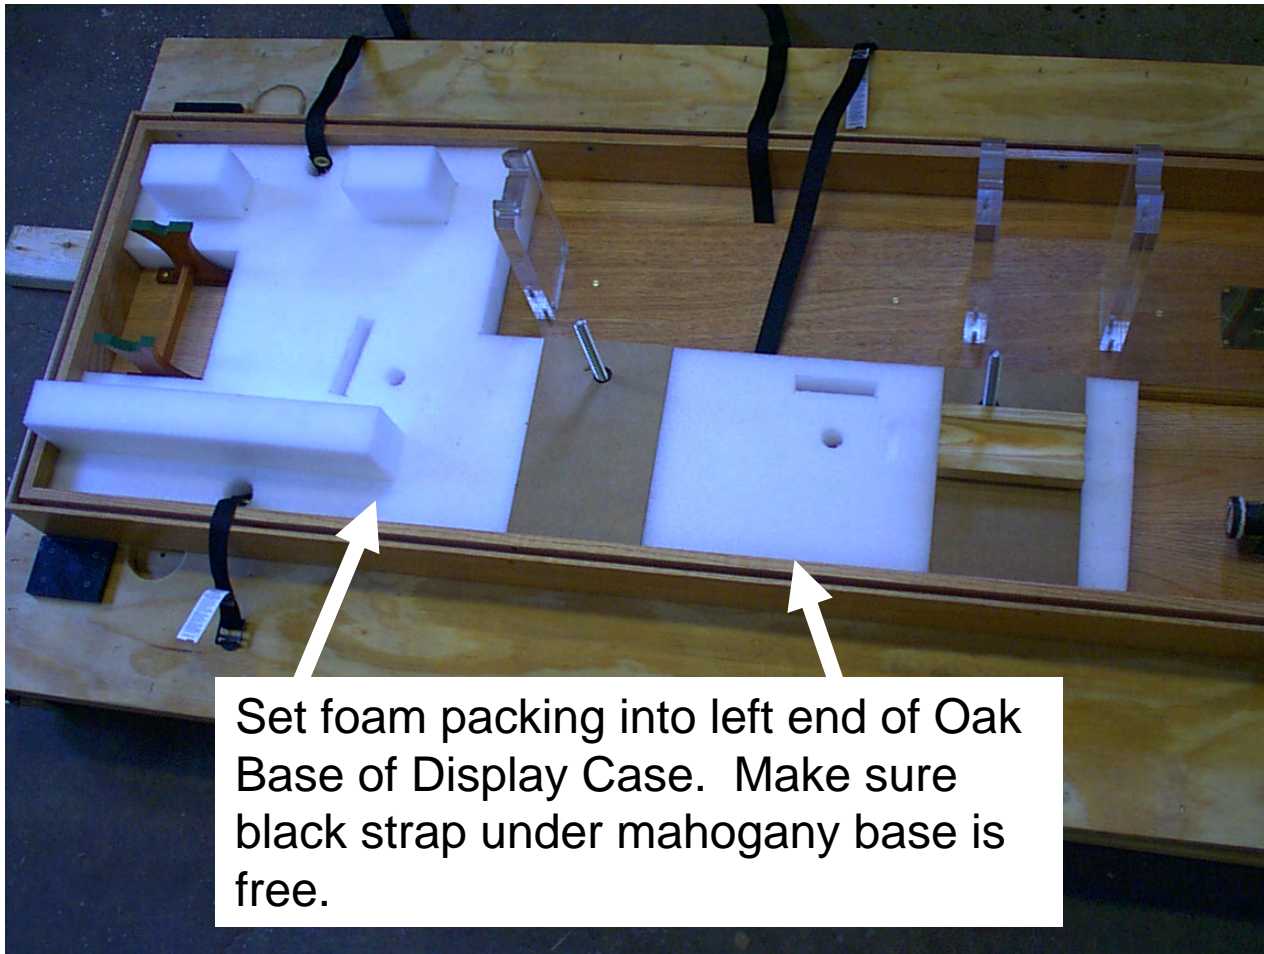

Securing Oak Base with Threaded Rod

1) Screw threaded rods through brass fitted holes in Oak Base into Tee nuts in Shipping Container Base.

3) Thread black strap under mahogany base through slot at bottom.

2) Then screw white nuts onto threaded rods to secure Oak Base to Shipping Container Base. Tighten securely!

Installation of foam packing

Set foam packing into left end of Oak Base of Display Case. Make sure black strap under mahogany base is free.

Locating Aston's 3rd MS for shipping

Lay MS on foam padding as shown.

Hardware and fittings for securing MS for shipping.
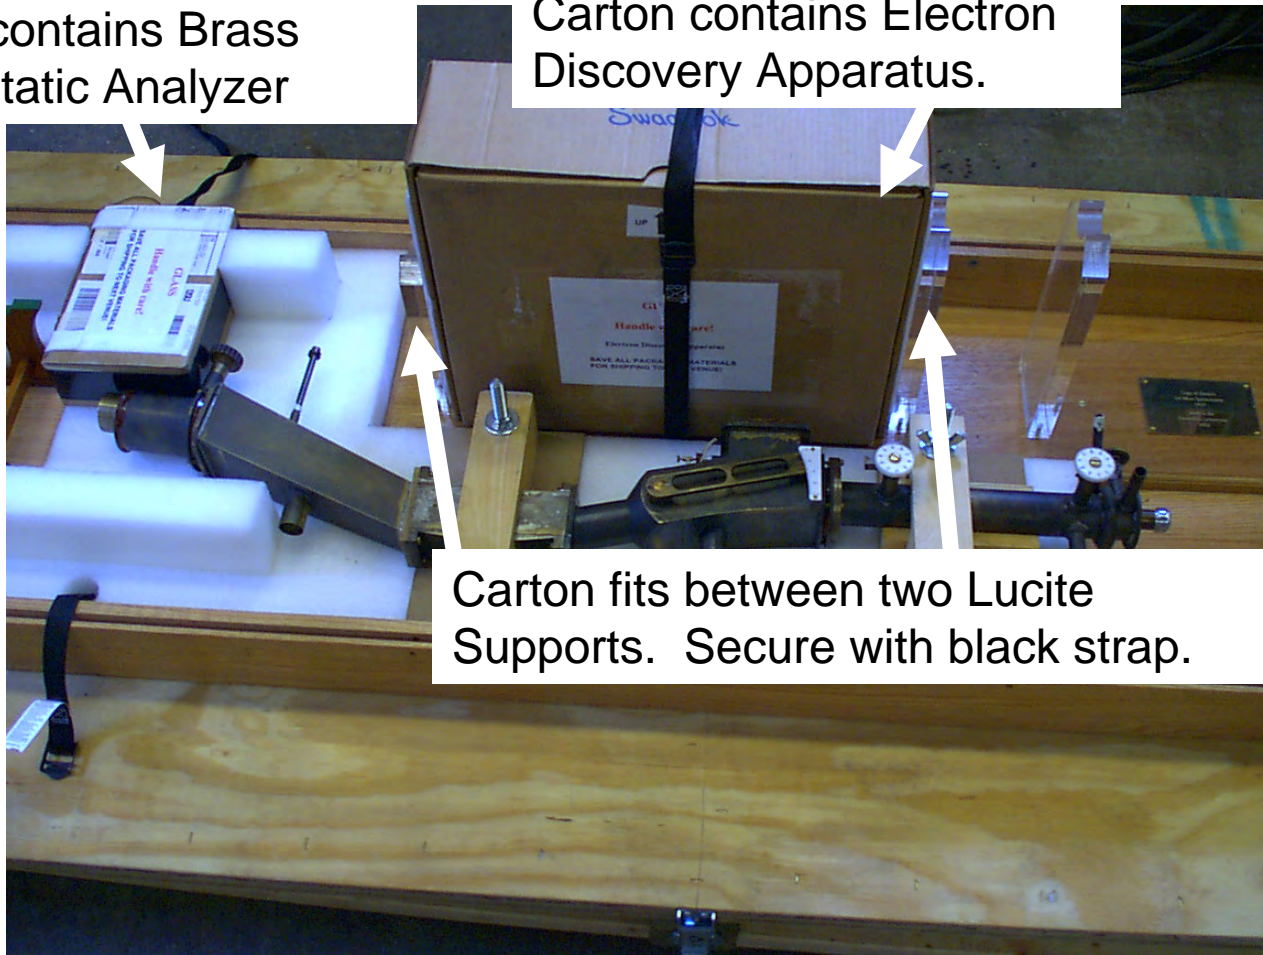

Securing MS for shipping

Place fittings and hardware as shown for securing MS for shipping. Tighten wing nuts securely!
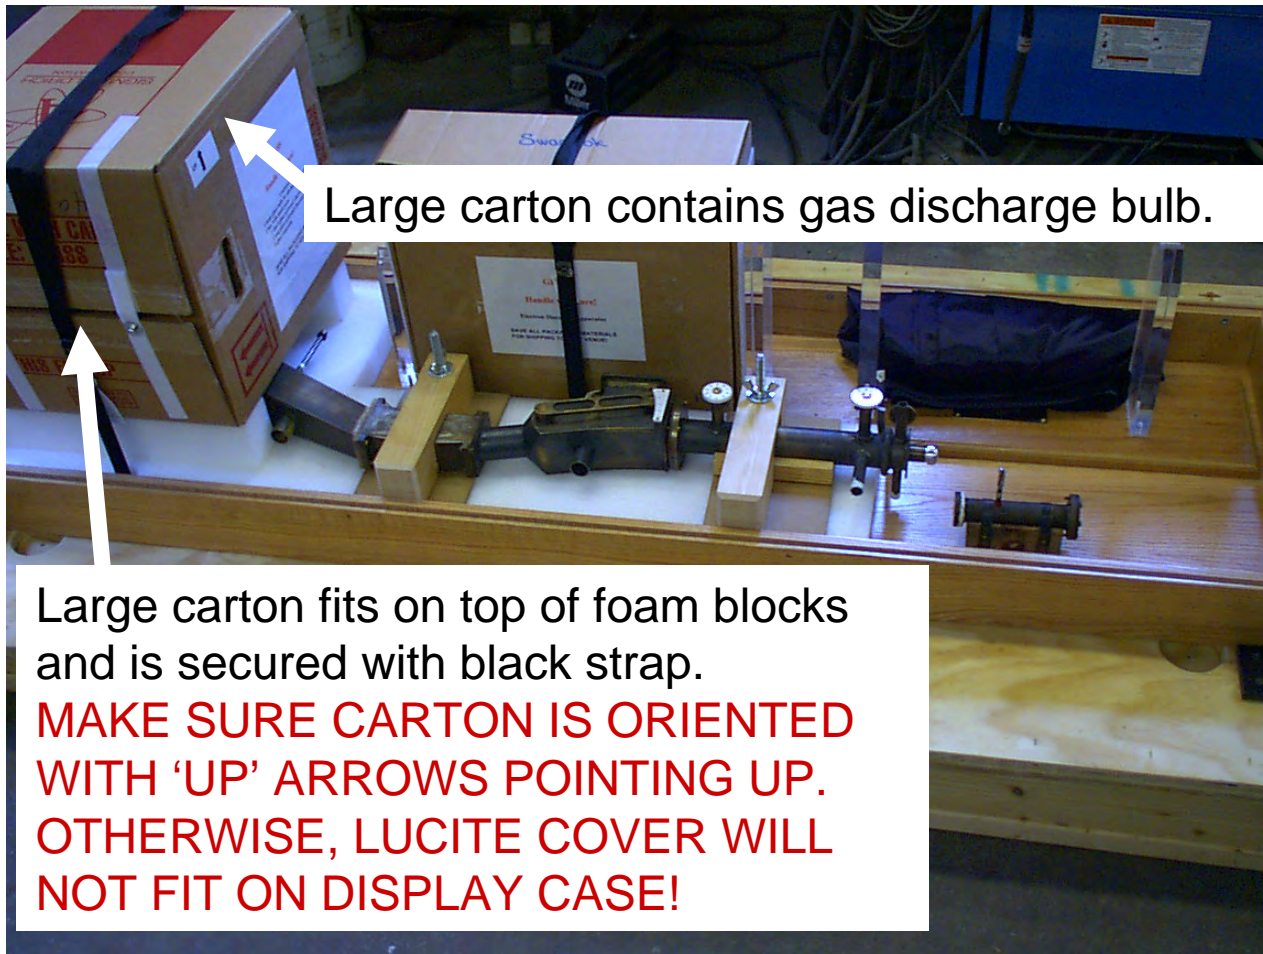

Placing 2 smaller cartons for shipping

Carton contains Brass Electrostatic Analyzer
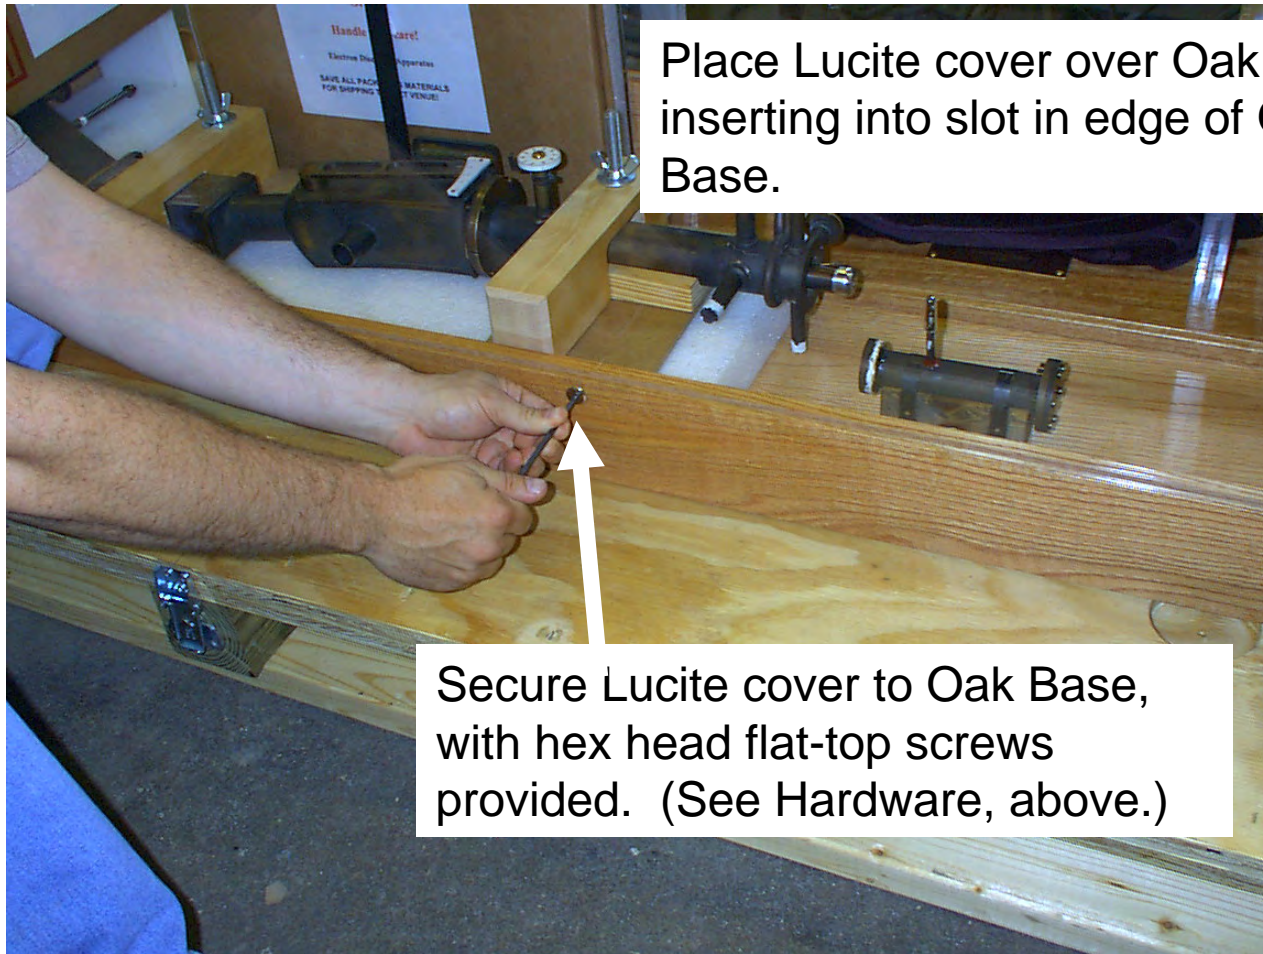

Carton contains Electron Discovery Apparatus.

Carton fits between two Lucite Supports. Secure with black strap.

Placing large carton for shipping

Large carton contains gas discharge bulb.

Large carton fits on top of foam blocks and is secured with black strap.
MAKE SURE CARTON IS ORIENTED WITH 'UP' ARROWS POINTING UP. OTHERWISE, LUCITE COVER WILL NOT FIT ON DISPLAY CASE!
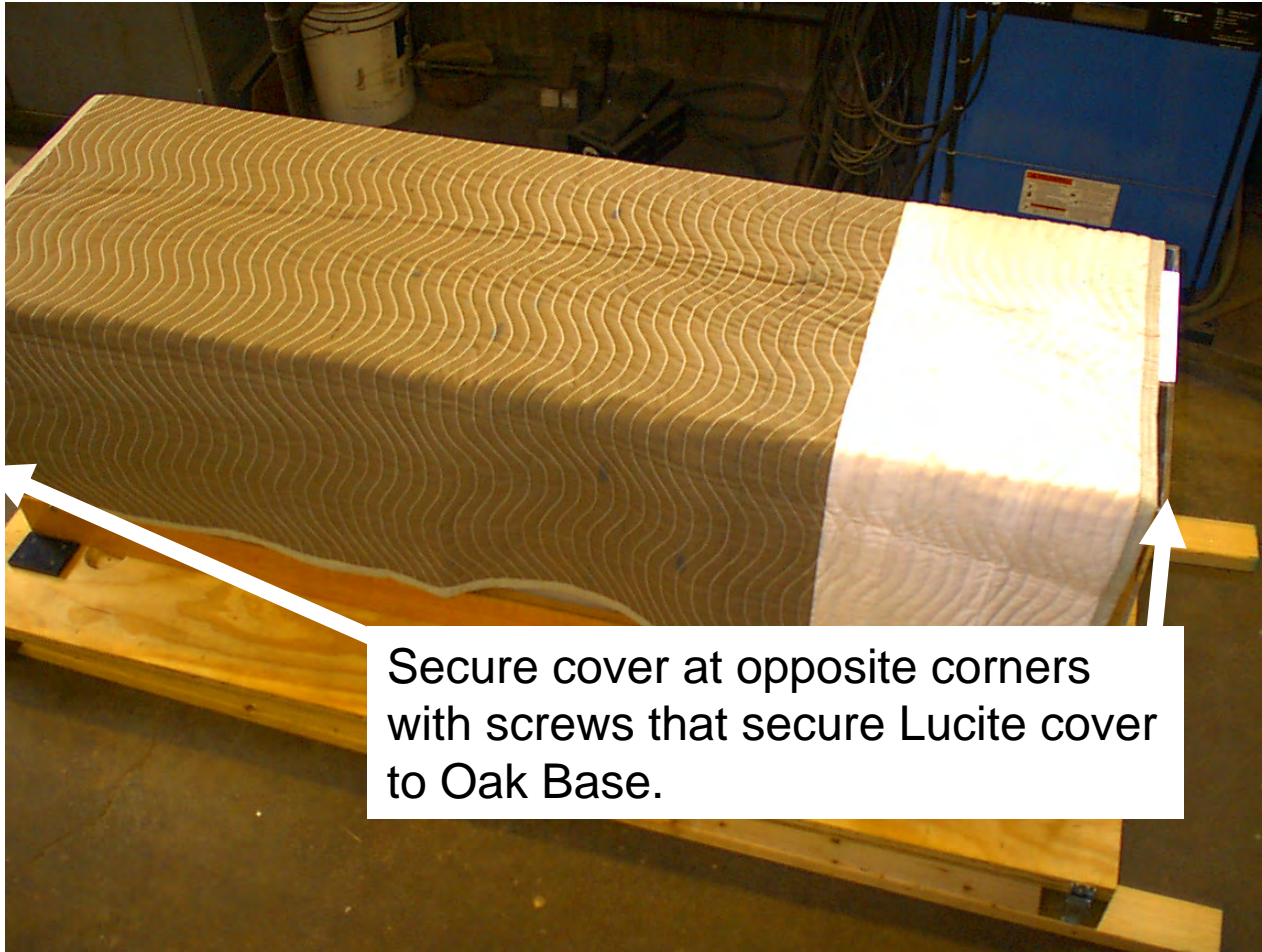

Installing Lucite cover for shipping

Place Lucite cover over Oak Base, inserting into slot in edge of Oak Base.

Secure Lucite cover to Oak Base, with hex head flat-top screws provided. (See Hardware, above.)
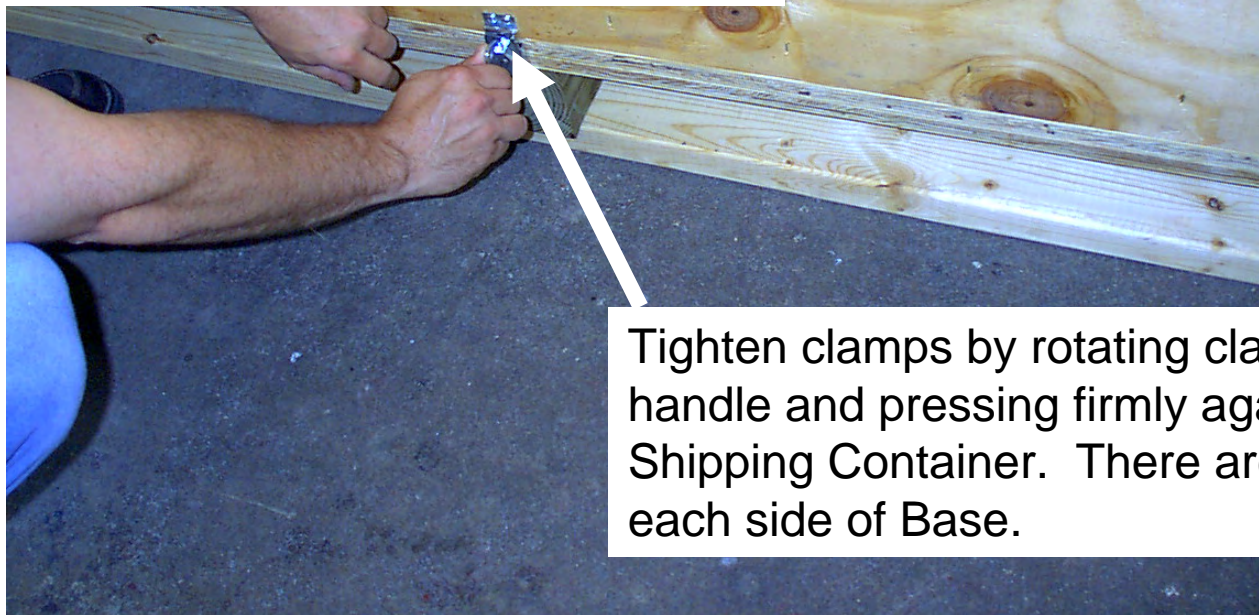

Cover Display

Secure cover at opposite corners with screws that secure Lucite cover to Oak Base.

Locate and Secure Middle Shipping Container

Lift Middle Shipping Container to clear exhibit on Shipping Base and lower to Shipping Base. Wooden corner blocks on Shipping Base will help locate.
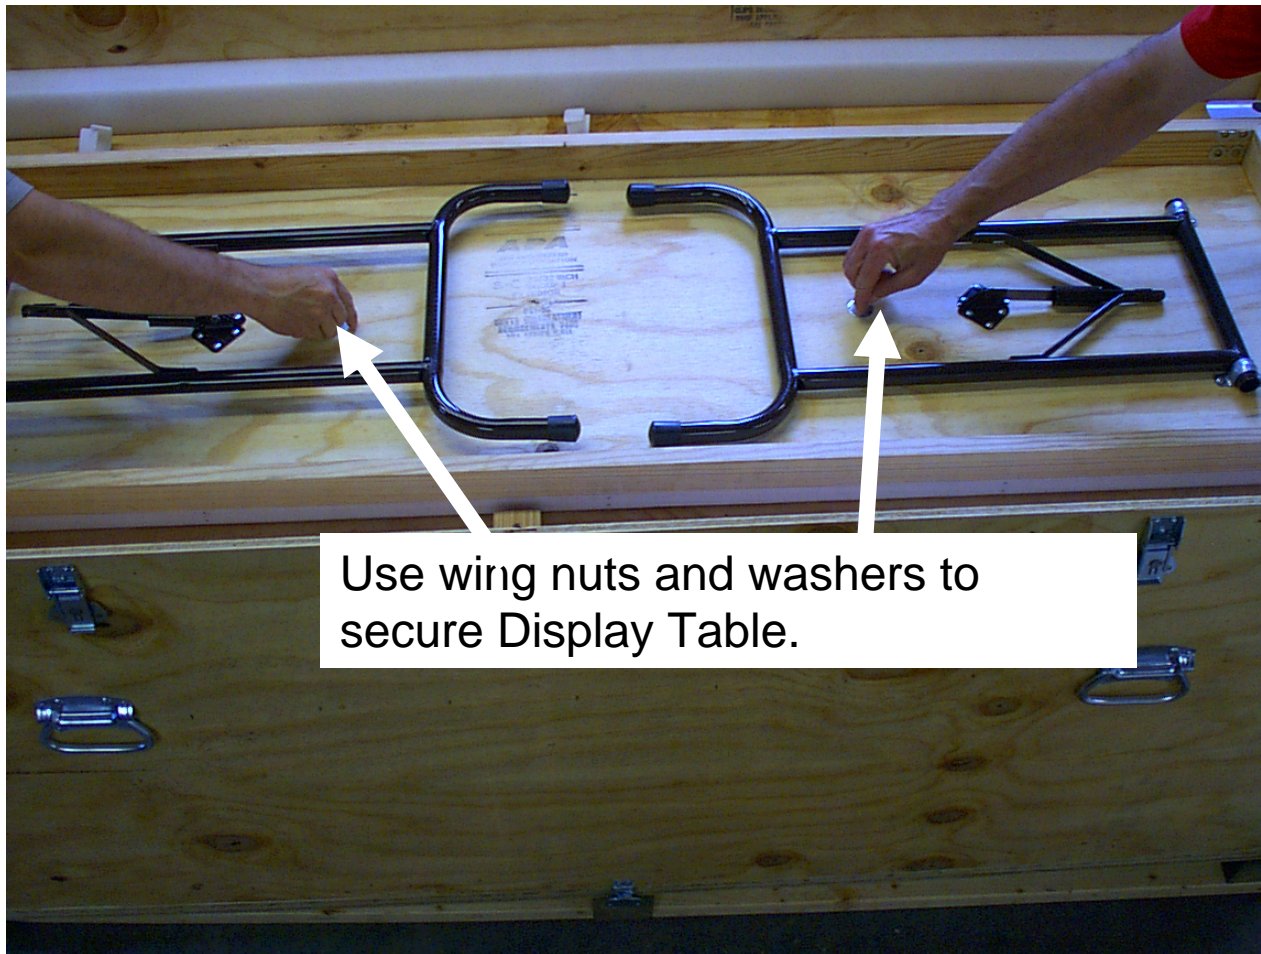

Tighten clamps by rotating clamp handle and pressing firmly against Shipping Container. There are 3 on each side of Base.
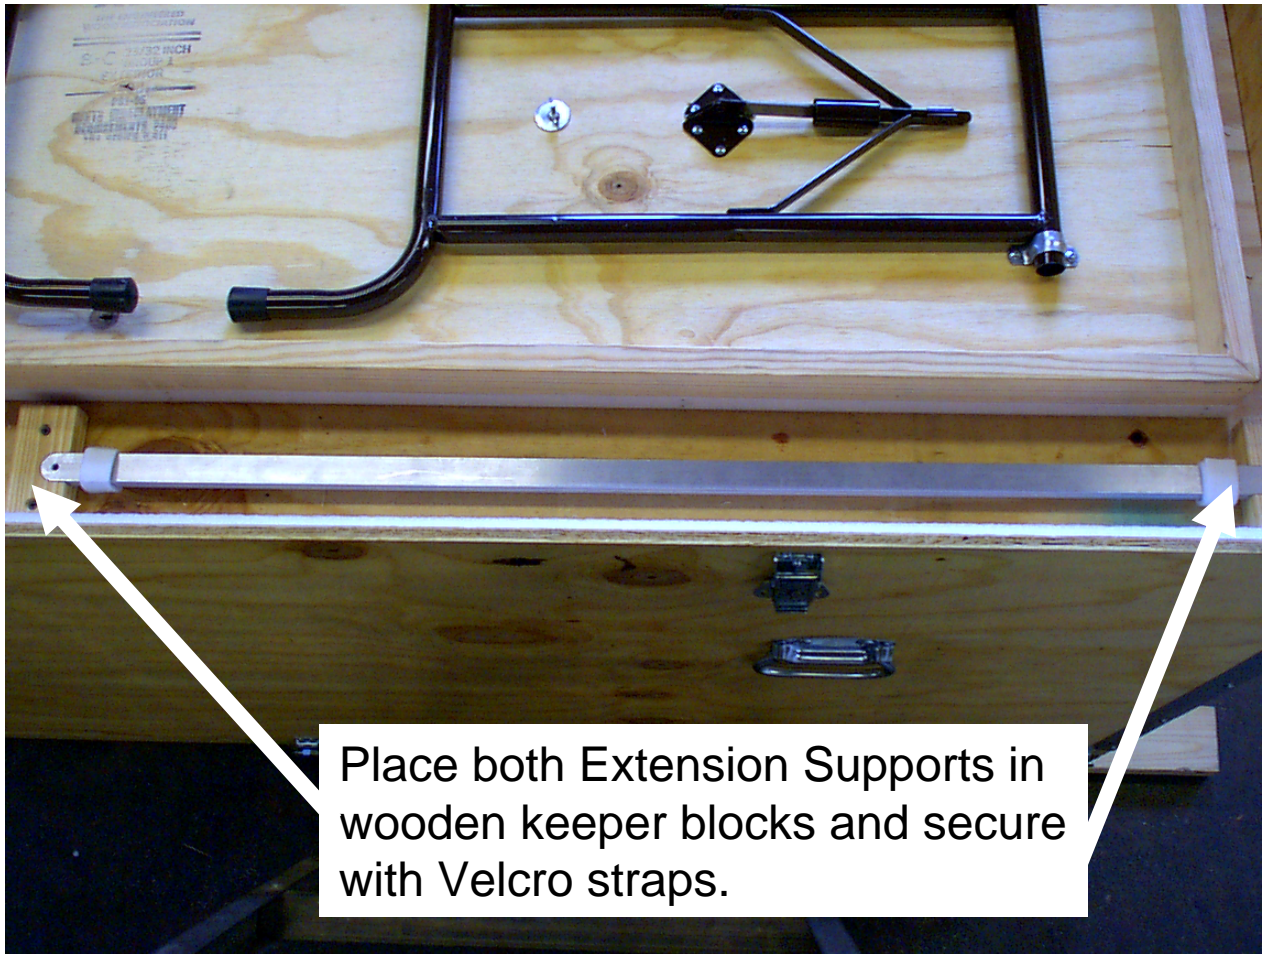

# Load Display Table into Middle Container

Secure Display Table to Middle Container

Use wing nuts and washers to secure Display Table.

Secure Extension Supports

Place both Extension Supports in wooden keeper blocks and secure with Velcro straps.
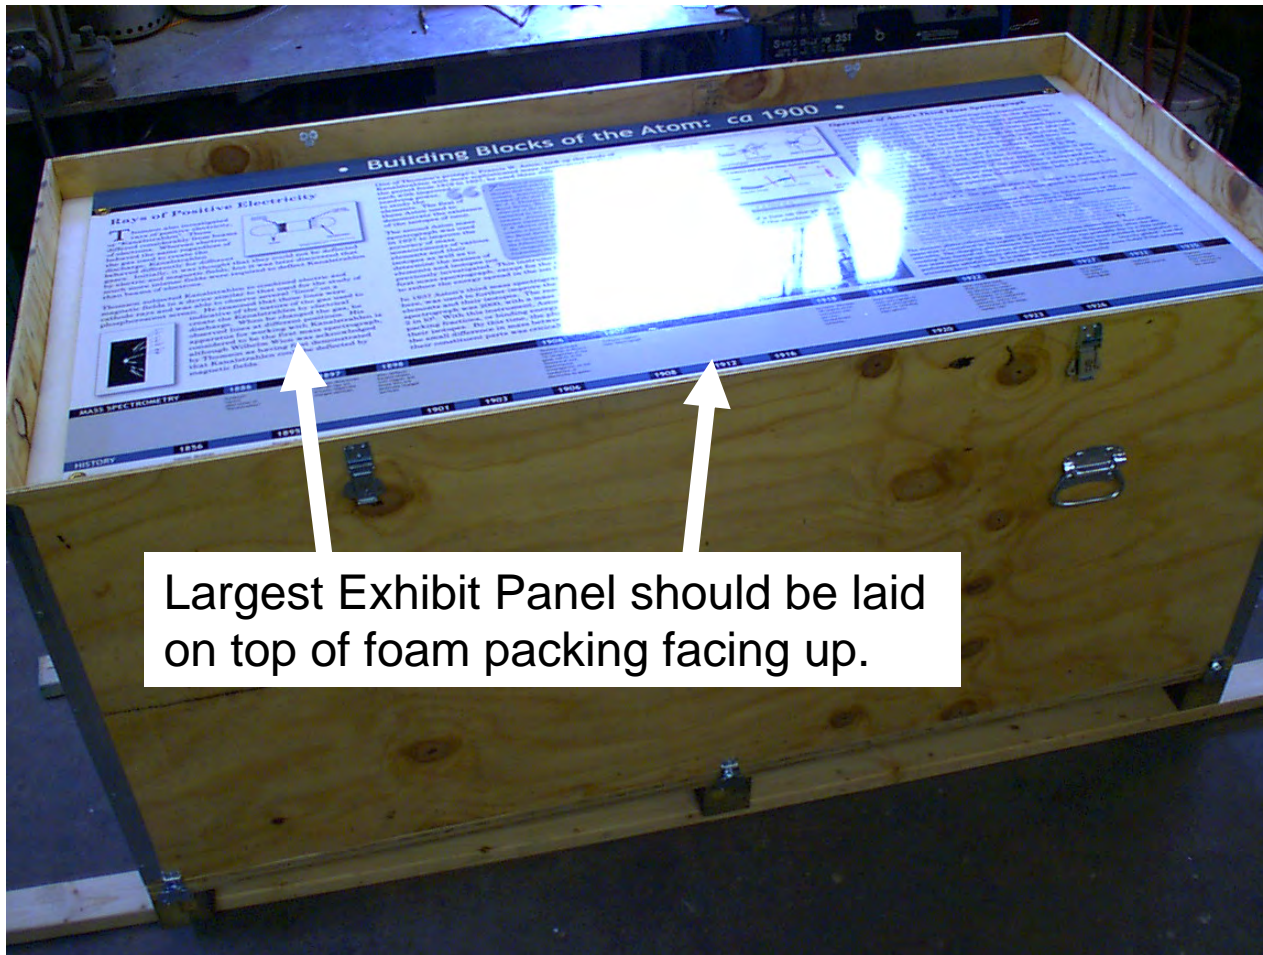

Securing Poles

Store Poles as shown and secure with Velcro straps.

# Insert Foam Padding in Middle Shipping Container

Place Exhibit Panels for Shipping

Largest Exhibit Panel should be laid on top of foam packing facing up.

Layer remaining Exhibit Panels

Arrange layers so printing on pink foam sheets does not come in contact with face of exhibit panels.

Place thin pink foam sheets between panels.

# Secure Lid to Shipping Container

Tighten Clamps

Screw end clamps for security

Clamps at end are fitted so screw can be inserted to secure clamp against curiosity seekers and others.

Completely packaged

Moving Options

May be hoisted by side handles

Furniture dollies, Pallet Jack, or Forklift can be inserted under Shipping Container Base
