

The Face of ASMS

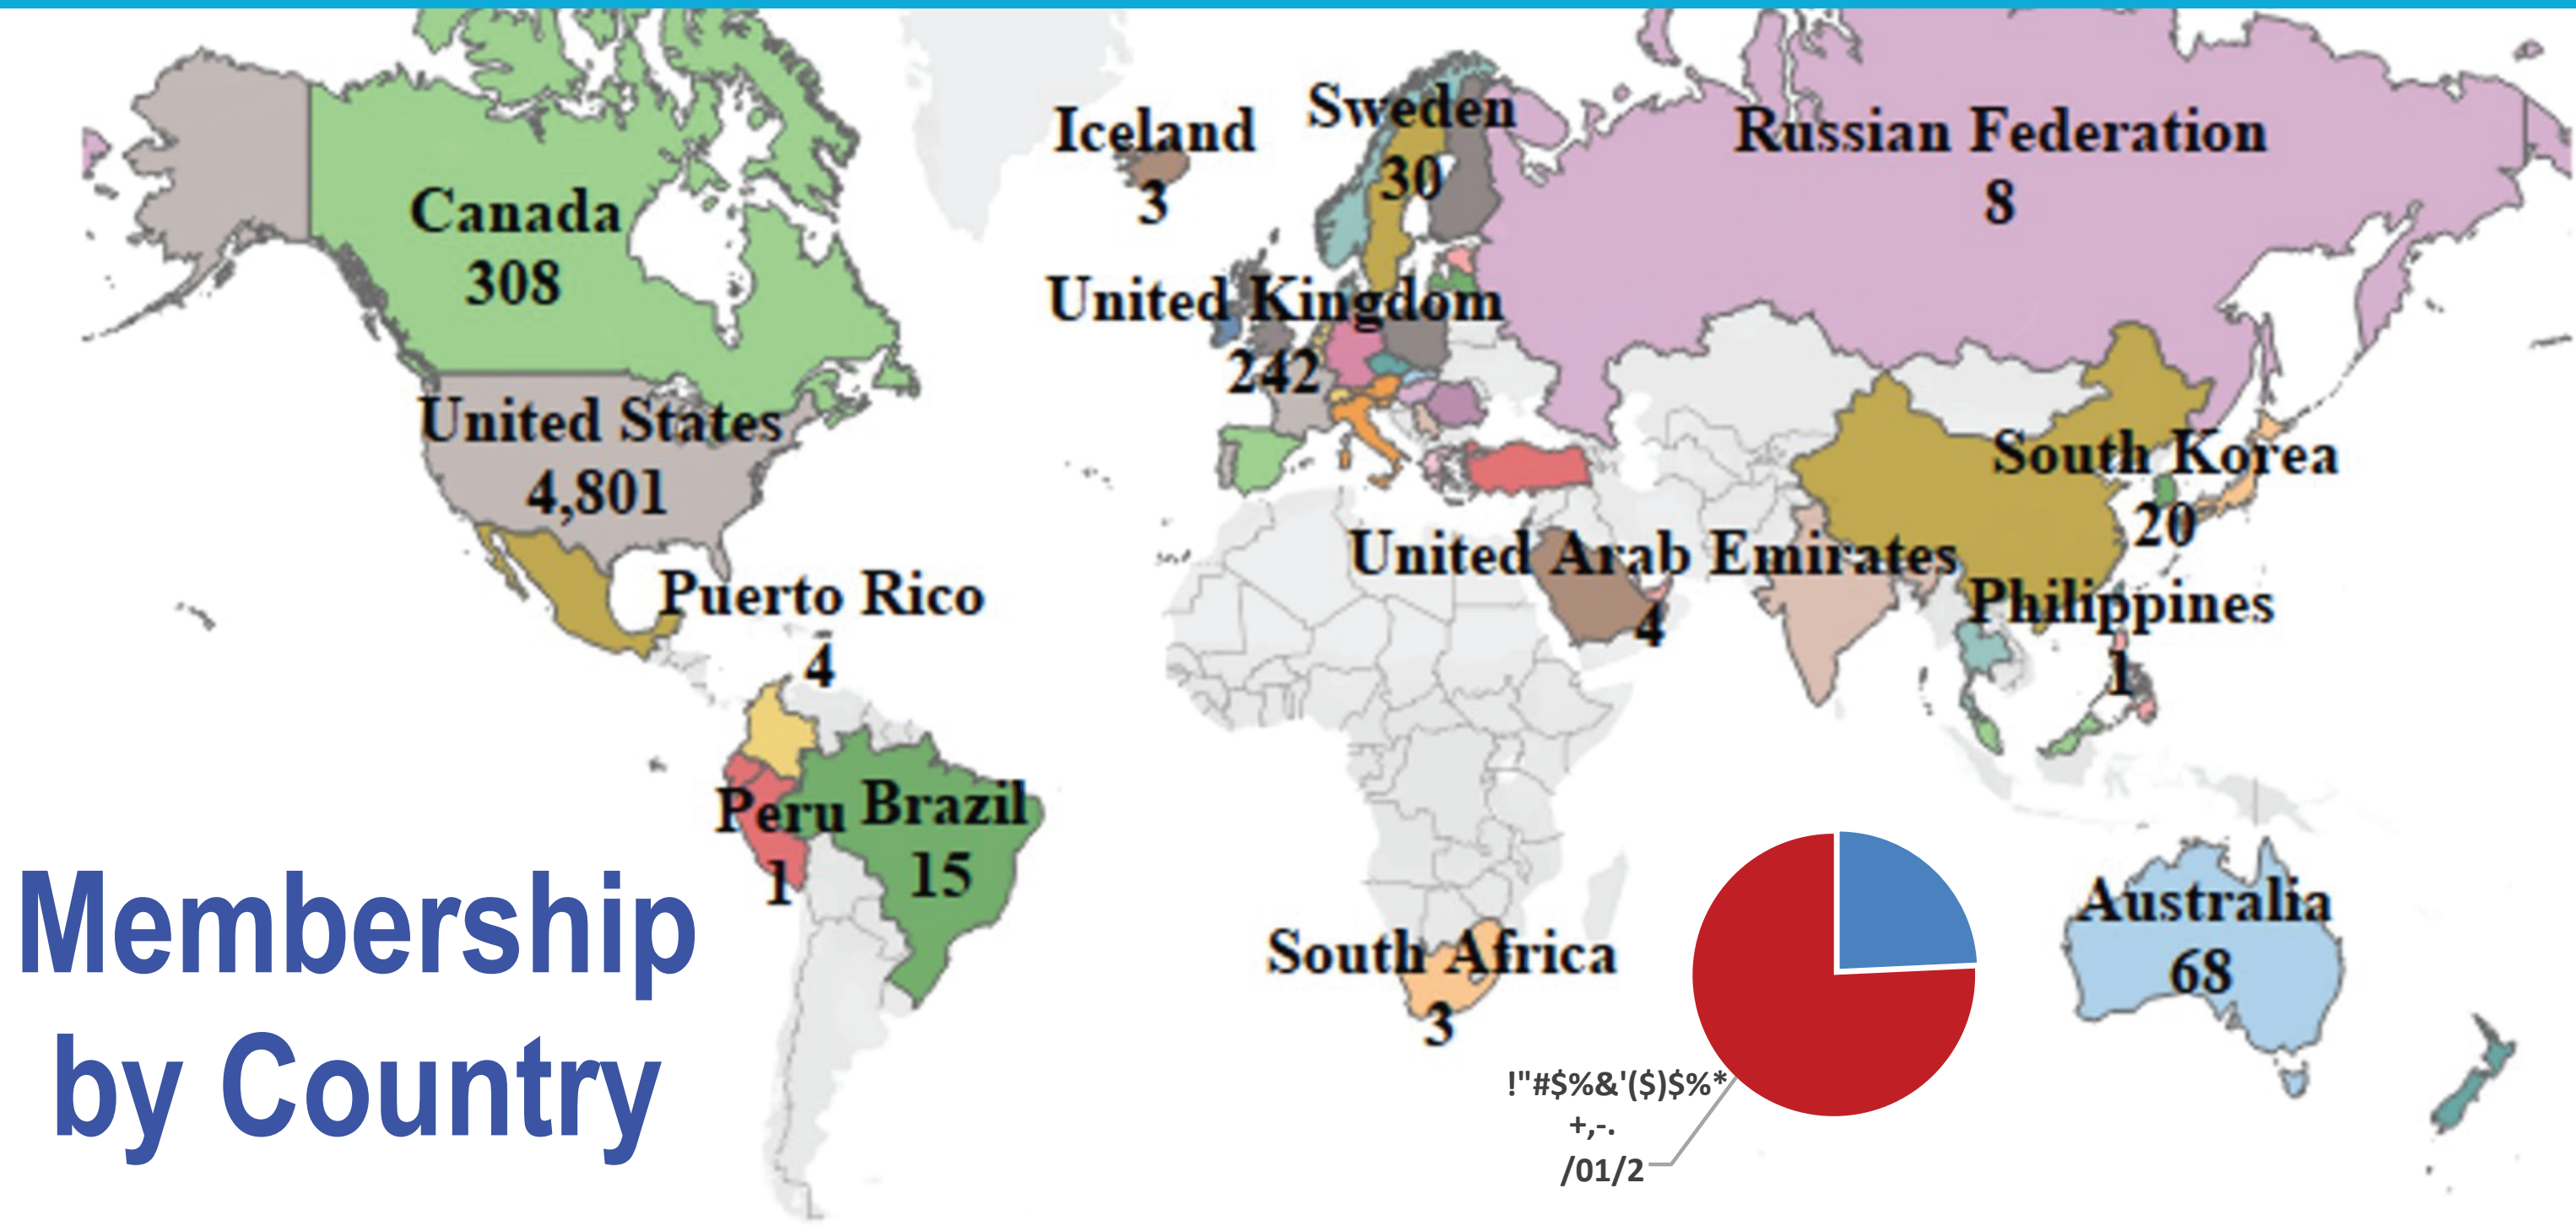

A look at Society annual demographic data prepared by the Membership, Diversity, and Inclusion Committee

Data derived from 2022 Membership. Total Members: 6,339

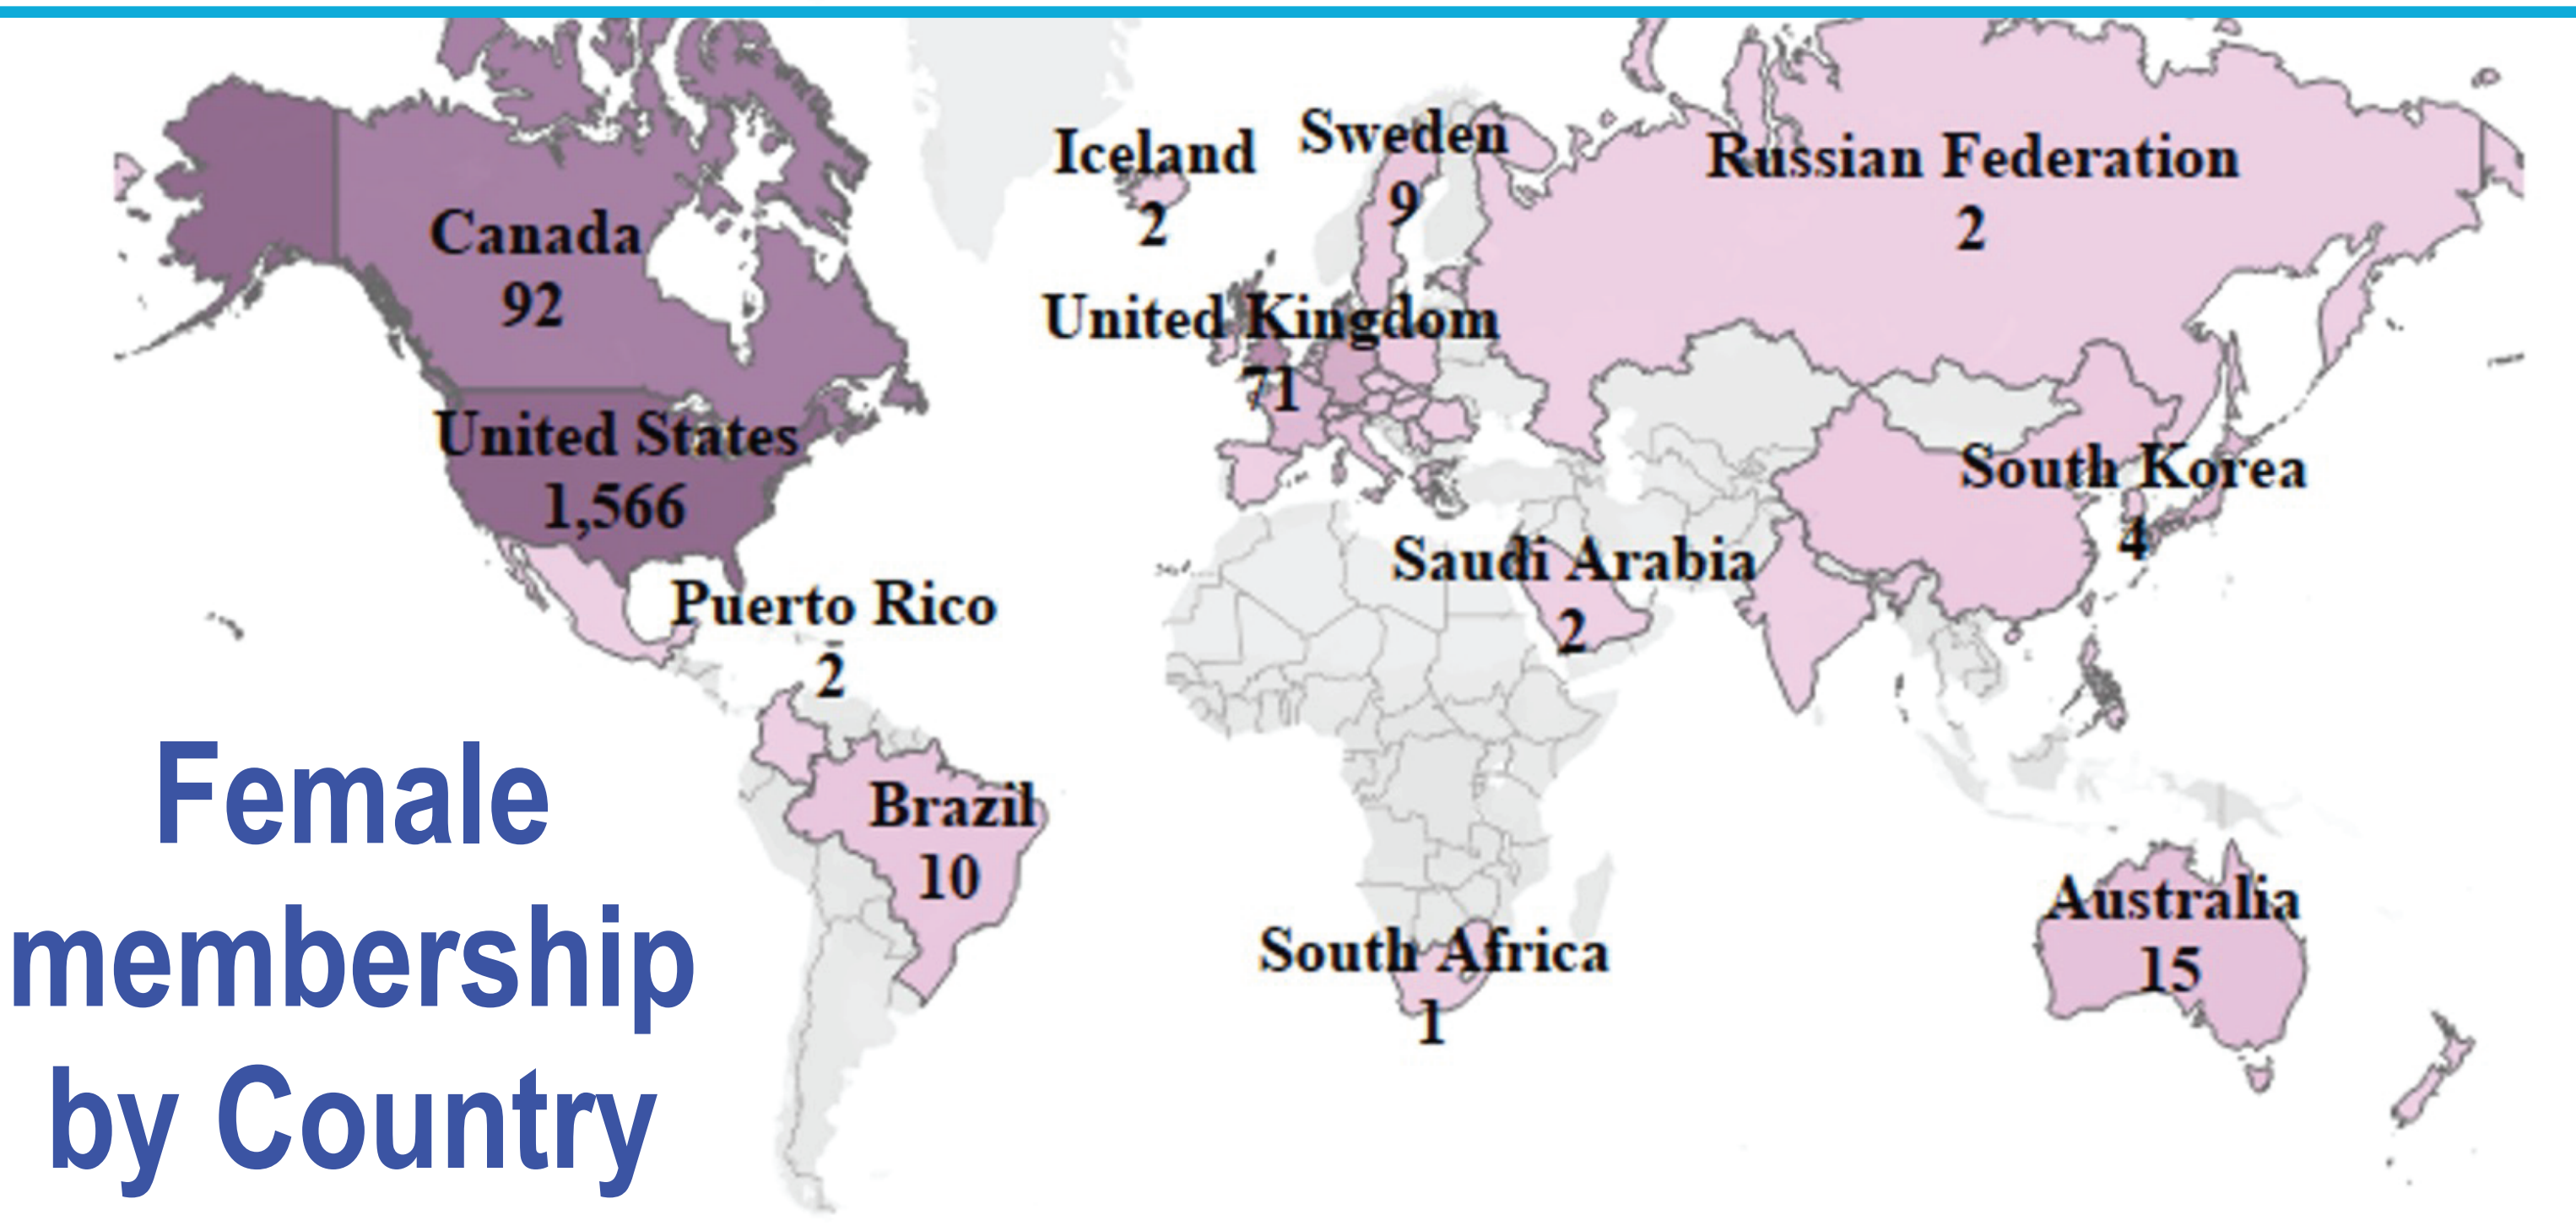

Where are members of ASMS from?

The ASMS community is growing all over the world.
In 2022 approximately 75.7% of the total members were based in the United States.

Membership by Country

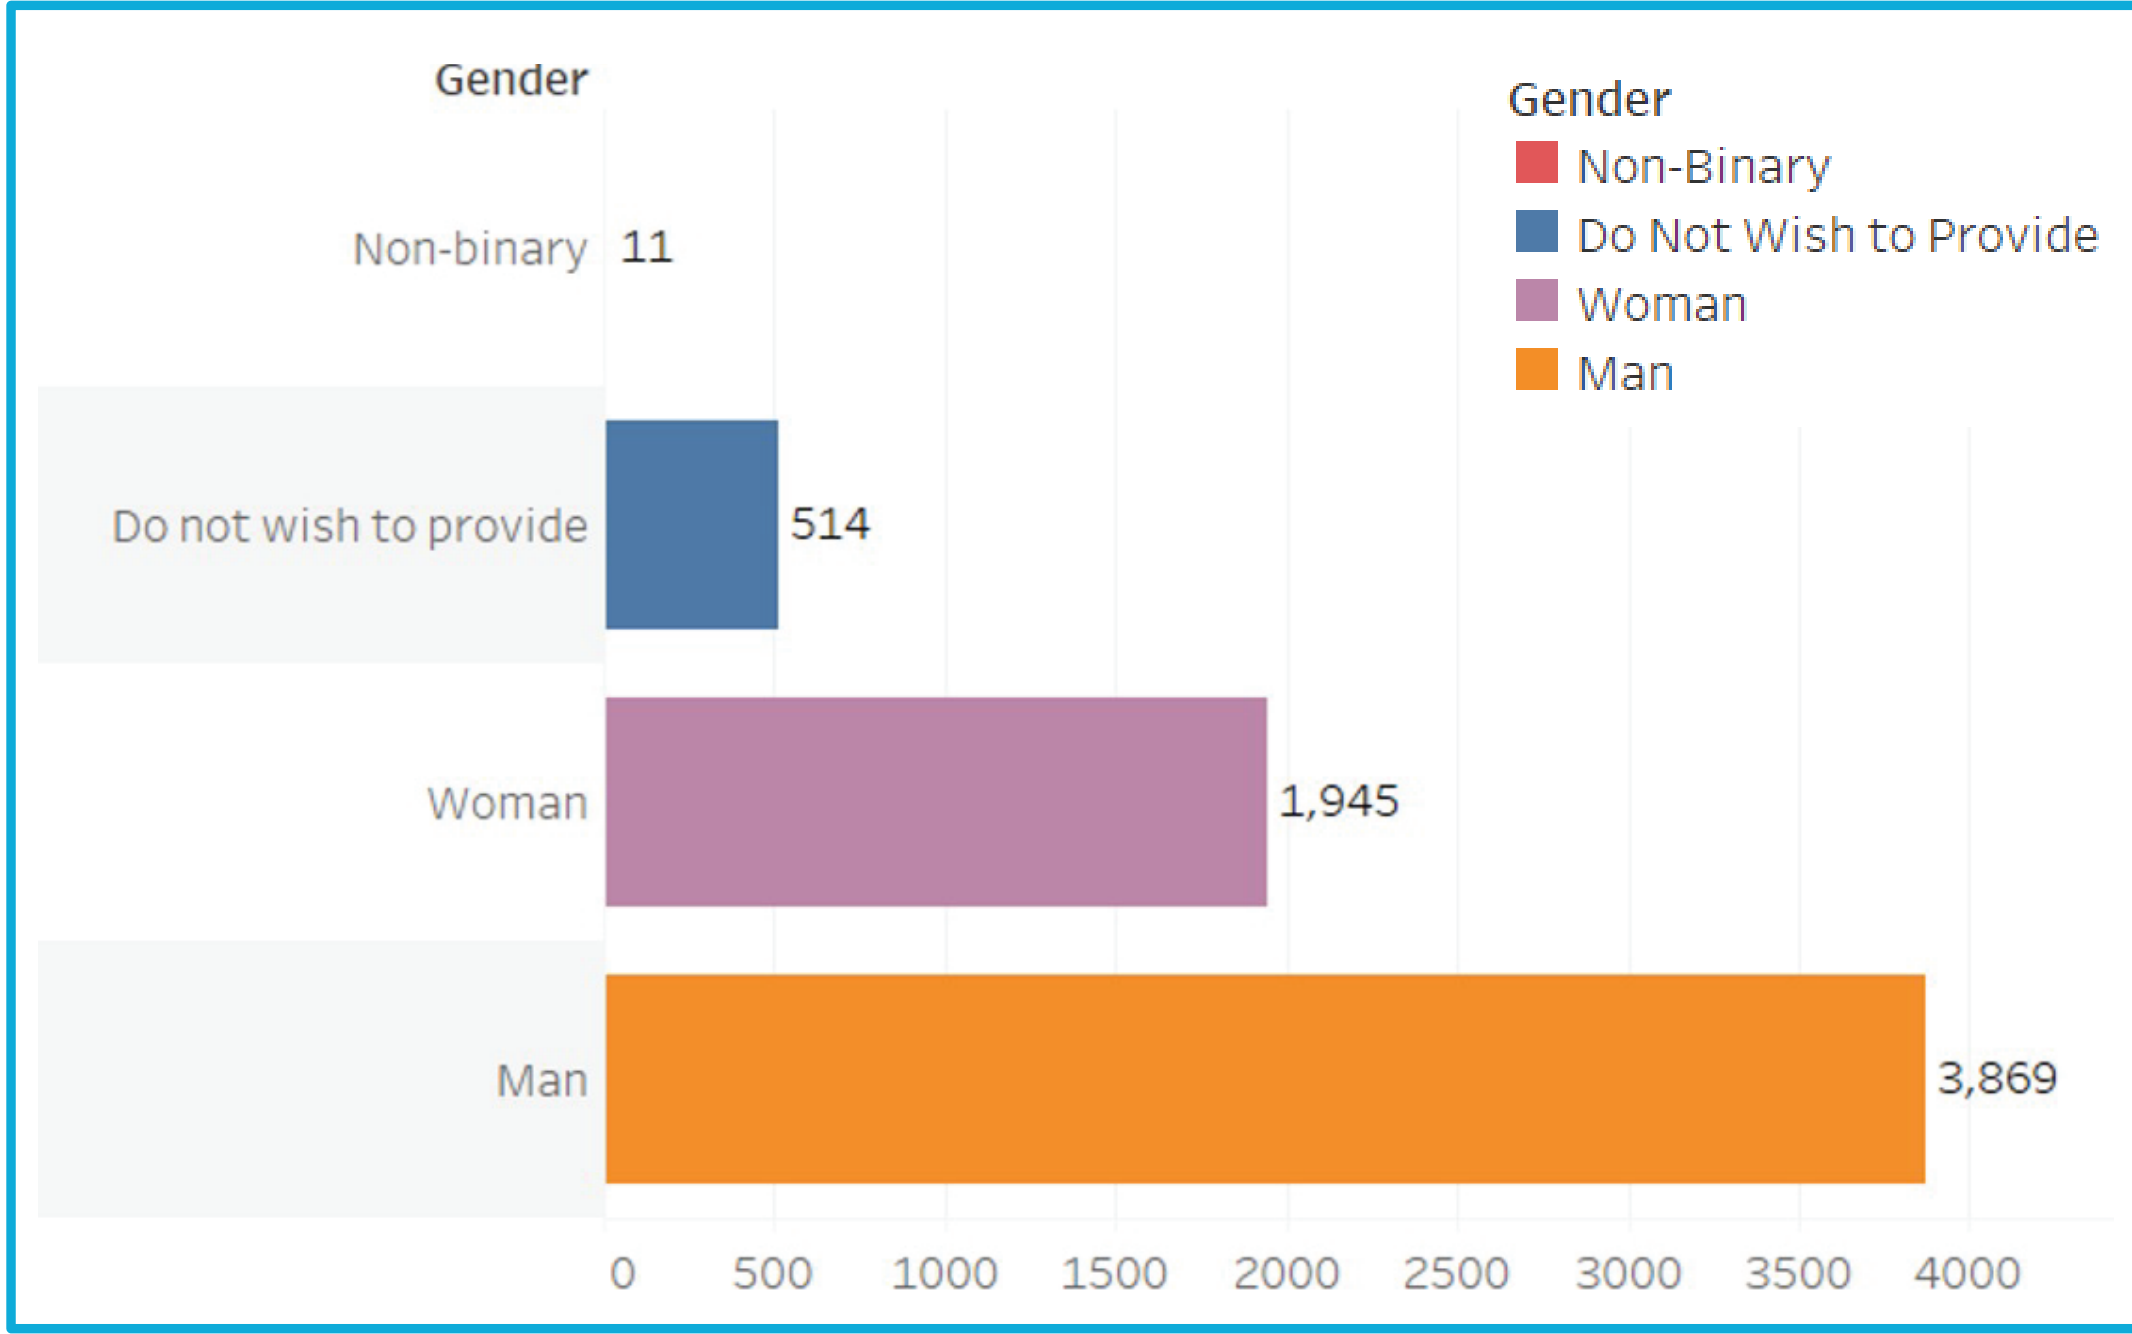

Female membership by Country

Gender Demographics

Women represent about one third (30.7%) of the total ASMS membership.

Gender and Country Demographics

While the woman to man one-half ratio (0.5) is roughly maintained internationally, the USA (0.55) and Canada [CA] (0.51) show slightly higher woman to man ratios.

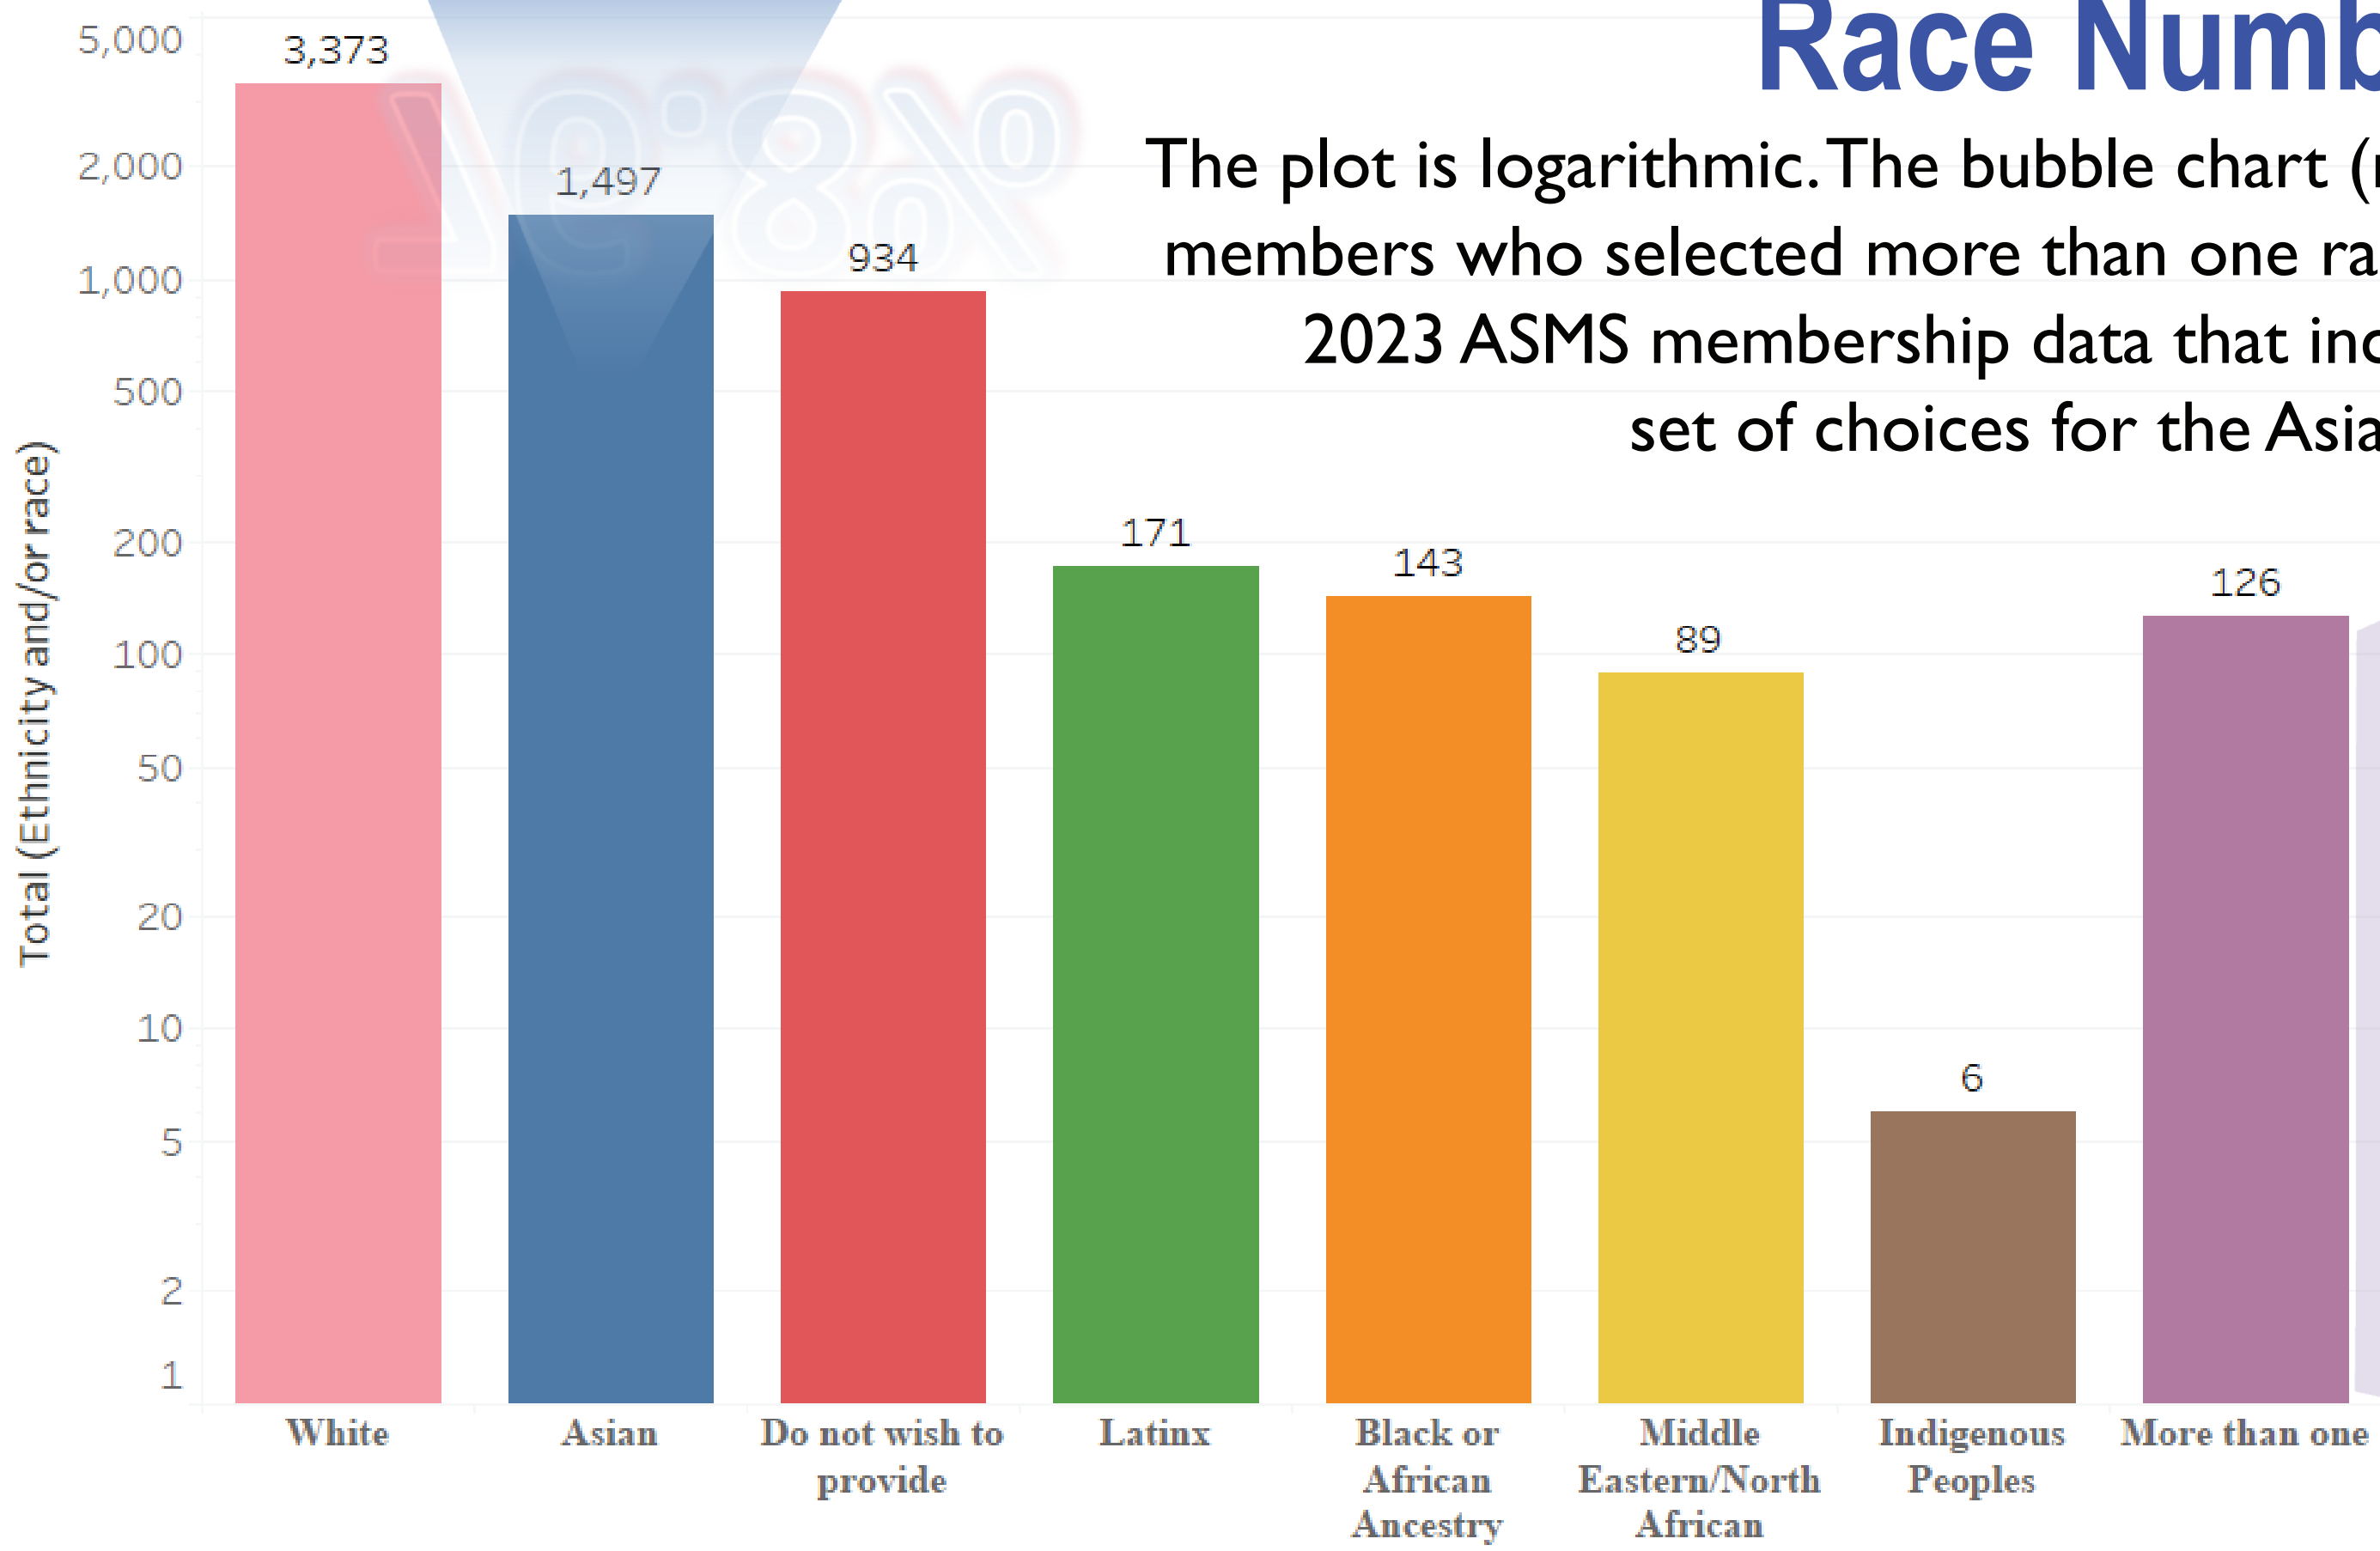

76.8%

White and Asian populations remain the largest member groups and represent 76.8% of members, followed by the "Do Not Wish To Provide" category with 14.7%.

Race Numbers

The plot is logarithmic. The bubble chart (right) shows the choices for members who selected more than one race. We look forward to the 2023 ASMS membership data that includes a more in-depth set of choices for the Asian category.

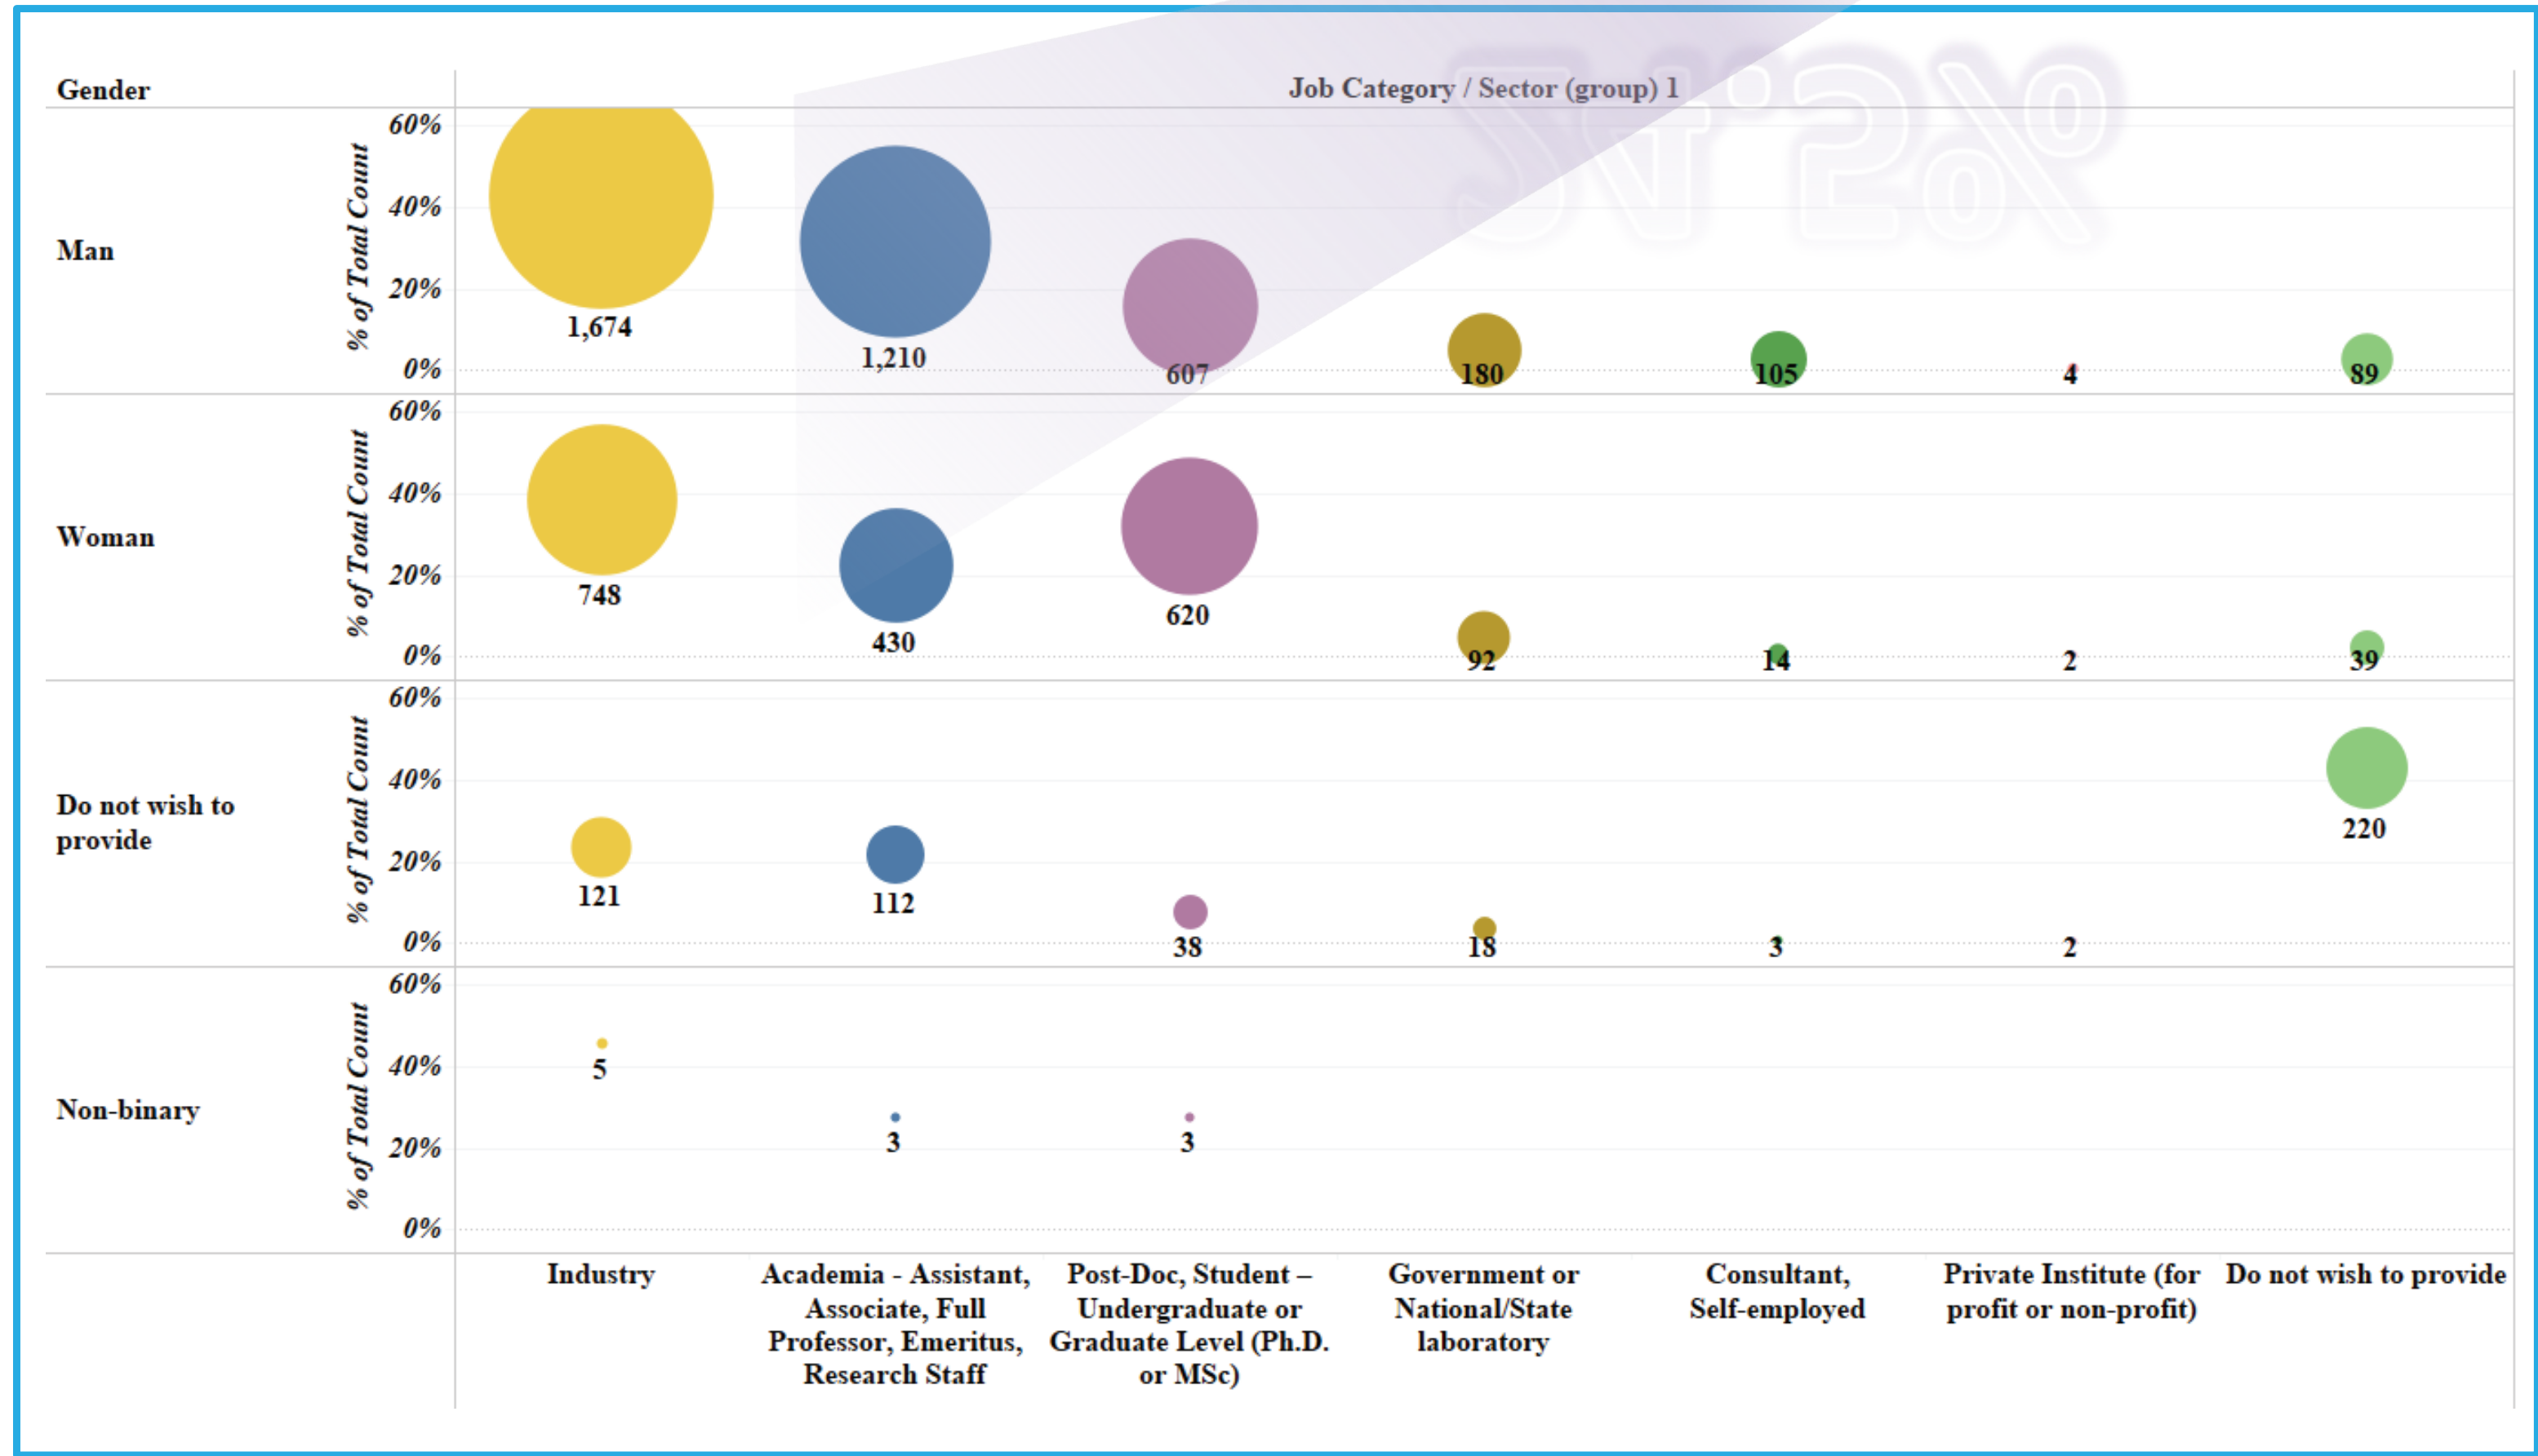

Job Categories by Gender

Regardless of gender, ASMS members mainly represented industry, government and academic institutions.

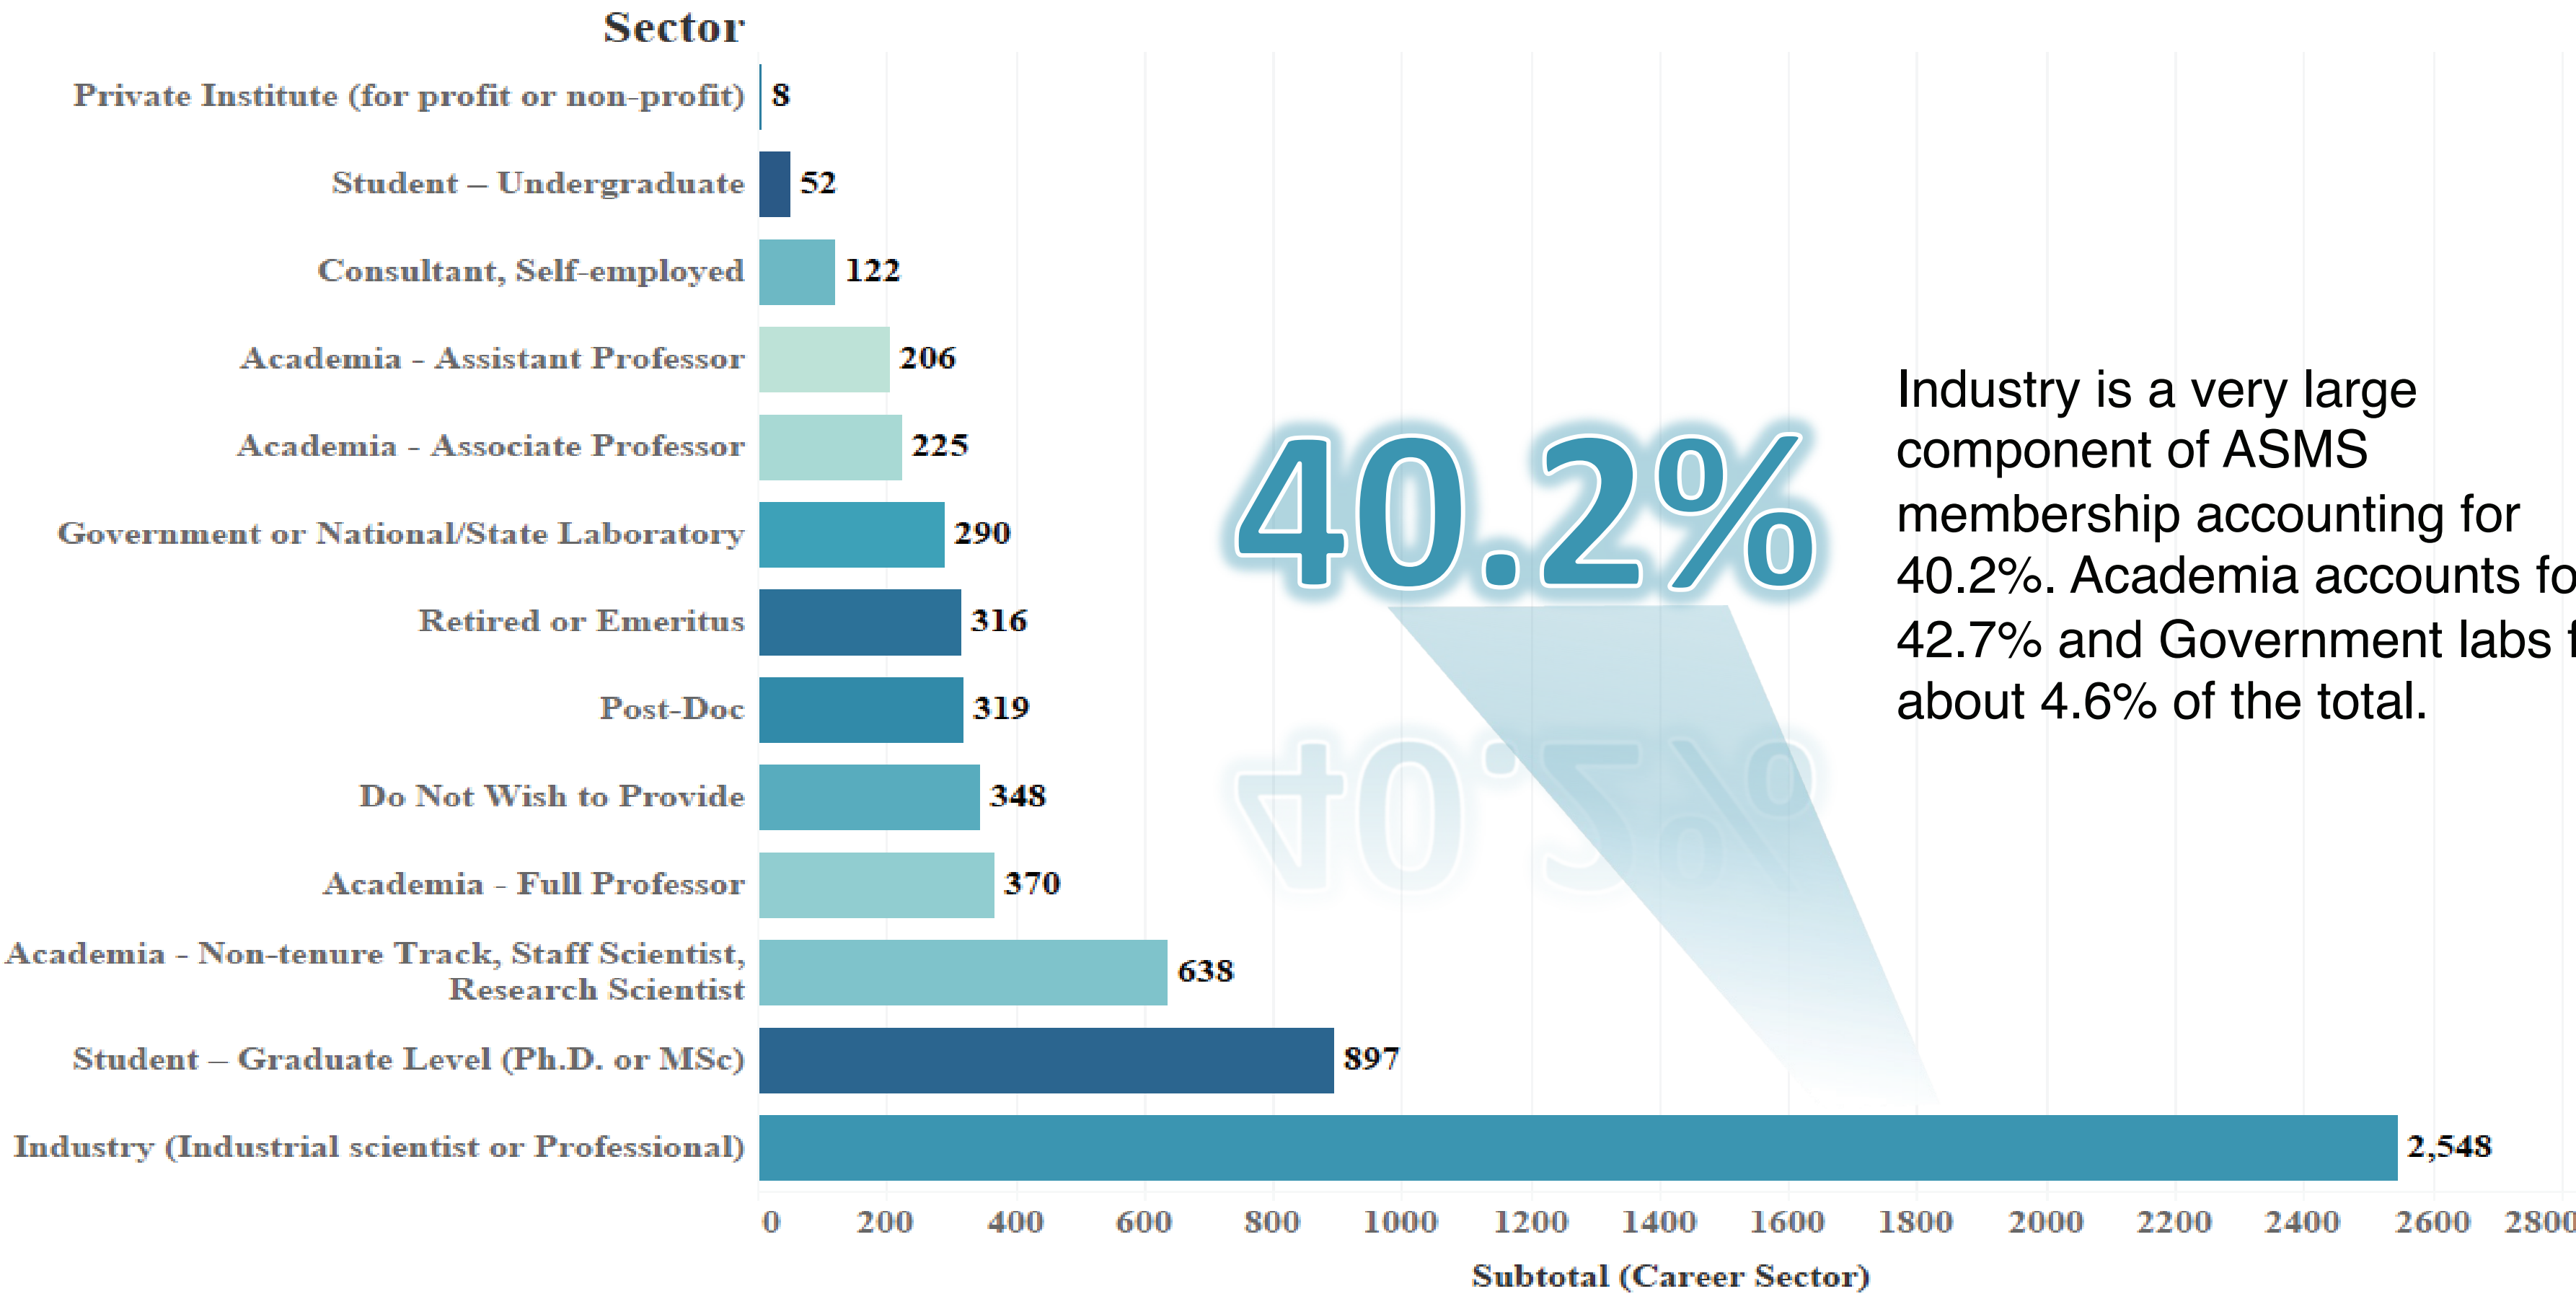

24.5%

Full-time positions in industry, academic, and the government sectors are dominated by men. Of these sectors, women's share is the lowest in academia (24.5%) and highest in government (31.7%).

Job Categories/Sectors

Academia (from all sources) is still the largest membership group followed closely by industry.

40.2%

Industry is a very large component of ASMS membership accounting for 40.2%. Academia accounts for 42.7% and Government labs for about 4.6% of the total.
