

TWO-DAY SHORT COURSE, Saturday and Sunday
14 Case Studies in Quantitative Proteomics

Instructors

Meena Choi
Northeastern University

Jake Jaffe
The Broad Institute

Brendan MacLean
University of Washington

Olga Vitek
Northeastern University

Preliminary Agenda

Day 1

- Intro to Protein Quantification
 - Challenges unique to proteins and peptides
- Principles of Study Design
 - Examples of failed studies, e.g. for lack of randomization (mouse label-free?)
- System Suitability and Quality Control for Proteomics
 - Getting used to looking at your data.
 - Show and Tell: What's wrong with my data?
- Case Study: Targeted Method Refinement
- Statistical Analysis of Proteomics Datasets and Intro to MSStats

Day 2

- Case Study: MS1 Quantification
- Intro to Data Independent Acquisition
- Case Study: Cellular Signatures based on a Phosphoproteomics Assay
