Program Organizer, ASMS Emerging Talent: Academia

### **Si Wu, University of Oklahoma**

Dr. Wu received her B.S. in Chemistry from Anhui University, and Ph.D. in Analytical Chemistry at the Washington State University with Professor James E. Bruce. She conducted her postdoctoral research on top-down proteomics at the Pacific Northwest National Laboratory (PNNL) with Drs. Ljiljana Paša-Tolić and Richard D. Smith. Later, she worked as a research scientist at Battelle Toxicology Northwest and a senior scientist at PNNL. Currently, she is an associate professor in the Department of Chemistry and Biochemistry at the University of Oklahoma. Her research interests focus on developing and applying high-throughput quantitative top-down proteomics techniques for addressing important clinical and biological questions.
