The American Society for Mass Spectrometry was formed in 1969 to promote and disseminate knowledge of mass spectrometry and allied topics. Membership includes scientists and other professionals involved in research, development and promotion of mass spectrometry. Members come from academic, industrial and governmental laboratories. Their interests include advancement of techniques and instrumentation in mass spectrometry, as well as fundamental research in chemistry, geology, forensics, biological sciences and physics.

**ASMS is one of the most dynamic scientific societies in the world and sponsors the following:**

- Annual Conference on Mass Spectrometry and Allied Topics: an open forum for the presentation of scientific research and the development of new applications and technology.
- Special topic short courses: continuing education for those in the field and introductory courses for those entering the field.
- *Journal of the American Society for Mass Spectrometry*: a peer reviewed monthly journal with a comprehensive range of research and development in mass spectrometry.
- The Fall Workshop: tutorial education on emerging techniques and applications
- The Asilomar and Sanibel Conferences: highly focused conferences on specific research topics in an informal setting.
- Publications: reprints of classic, out of print mass spectrometry books
- Awards: numerous prestigious awards and grants to recognize and support the mass spectrometry community
- Other special programs such as the Emerging Talent: Academia, Government, and Industry webinar series to highlight young researchers transitioning to their first positions.

**ASMS members receive:**

- Subscription to the monthly *Journal of the American Society for Mass Spectrometry*
- Discounted registration for all conferences and short courses
- Access to private areas of the web site ([www.asms.org](http://www.asms.org)): the employment center, membership directory, archives of the conference proceedings, archives of the John Wiley mass spectrometry journals, and collection of tutorial lectures

### Demographic Data for Member

As a society we hope to serve a diverse group of researchers and scholars from different backgrounds in a transparent manner. Collection of demographic information will help us better understand how well we reflect the general population and how we compare to other scientific and academic societies and organizations. Personal information will remain confidential.
