

Workshop: H/D Exchange, Covalent Labeling, and Cross-Linking Interest Group
Date: June 6 2022
Organizers: Janna Kiselar, Case Western Reserve University
Clinton Yu, University of California, Irvine
Argyris Politis, King's College London

Attendance: ~130

After much feedback related to the lack of time for audience driven questions and discussion, this year we had a minimal introduction to each technique: HDX/CL/XL followed by open discussion related to each technique. Due to last minute emergencies, the two original organizers: Corie Ralson and Mike Guttman, were unable to make the meeting and thankfully the three acting organizers stepped in to oversee the workshop. Much of the time work the workshop was spent addressing questions from people interested in adopting these technologies and wanting to learn about both fundamental and practical aspects of applying these tools.

The workshop agenda is below.

5:45-6:05 Introductions to CL/XL/HDX from organizers

6:05-7:00 Open discussion on each topic, approximately divided evenly among the three methods.
